

SPACE, THE FINAL FRONTIER

**NX – the new waveform for 5G
hype(r) technology**

SPACE, THE FINAL FRONTIER

Before we start (Dish)

- The original scope of 3GPP in 1998 was to produce Technical Specifications for a 3G mobile system
- The scope has evolved but the name remains, should we change it to 5GPP or 10GPP?
- Or should it be renamed to something futuristic, timeless and limitless?

NX-GPP!

UNUSUALSUSPEX - 2013

SPACE, THE FINAL FRONTIER

5GNX.COM

- For profit collaborative organization to promote NX technology
- Personnel
 - 5G general
 - Scientific advisor
 - Experienced standardization delegate
 - Contributions from several technical experts and researchers

3GPP TS 56.211 V15.2.0 (2015-09)

Technical Specification

3rd Generation Partnership Project:
 Technical Specification Group Radio Access Network;
 NX
 Physical channels and modulation
 (Release 15)

Version	Date	Notes
15.2.0	2015-08-27	
15.1.0	2015-08-26	
15.0.0	2015-08-25	

You can propose a CR to the specification by sending an email to change-requests@5gnx.com

Cr no.	Rev.	Cat.	Rel.	Title	Source
1	-	F	Rel-15	Correction of ultra-lean transmission	5GNX.COM

UNUSUALSUSPEX - 2013

NX phasing

- Phased approach to NX deployment
- Phase 0
 - Hype(r)-lean carrier
 - Hype(r)-forward compatibility
 - Without-Software Defined hype(r) NW
- Later phases (1, 2, 3)
 - Full and enhanced 5G functionality

SPACE, THE FINAL FRONTIER

Phase 0 availability

- **5GNX.com offers phase 0 compliant technology for immediate availability**
- **Solutions for both**
 - network deployment
 - end-user terminals

UNUSUALSUSPEX - 2013

Hype(r)-lean carrier

- **extremely high energy efficiency for both networks and terminals**
 - up to 100% of the energy cost of the network equipment
 - support for infinite terminal battery life time
- **significant reduction of interference**
 - eliminating up to 100% of the interference created by 5G NX technology.

UNUSUALSUSPEX - 2013

Hype(r)-forward compatibility

- **Allows deployment of any future technology without impacting existing NX deployments.**
- **Allows operators and end-users to retain their existing equipment also for when further major technology innovations (such as “6G”) are deployed.**

SPACE, THE FINAL FRONTIER

Without-Software Defined hype(r) NW

- Legacy technology like NFV and SDN need to be evolved
- WSDN has proved very efficient for developers
 - Hyper-quick time to market
 - Hyper low code size and code complexity
 - Good for hype(r) low cost devices
 - Minimization of bugs

UNUSUALSUSPEX - 2013

SPACE, THE FINAL FRONTIER

Trials

- **Small scale universal trials conducted, testing the phase 0 technology operation**
